

# SCALAR ENERGY FOR THE WORLD...

*In 1992, a woman living in Cameroon, Africa, was detected as being HIV positive. For 25 years, she followed an anti-viral drug regimen that served to fight against the HIV viral infection.*

*Subsequently, the The Scalar Light Pathogenic Cleanse was administered.*

*In 2016, she was cured of HIV viral disease.*

*Scalar Light upon photographs of people, animals, plants, or objects.*

*We do not work directly with people.*

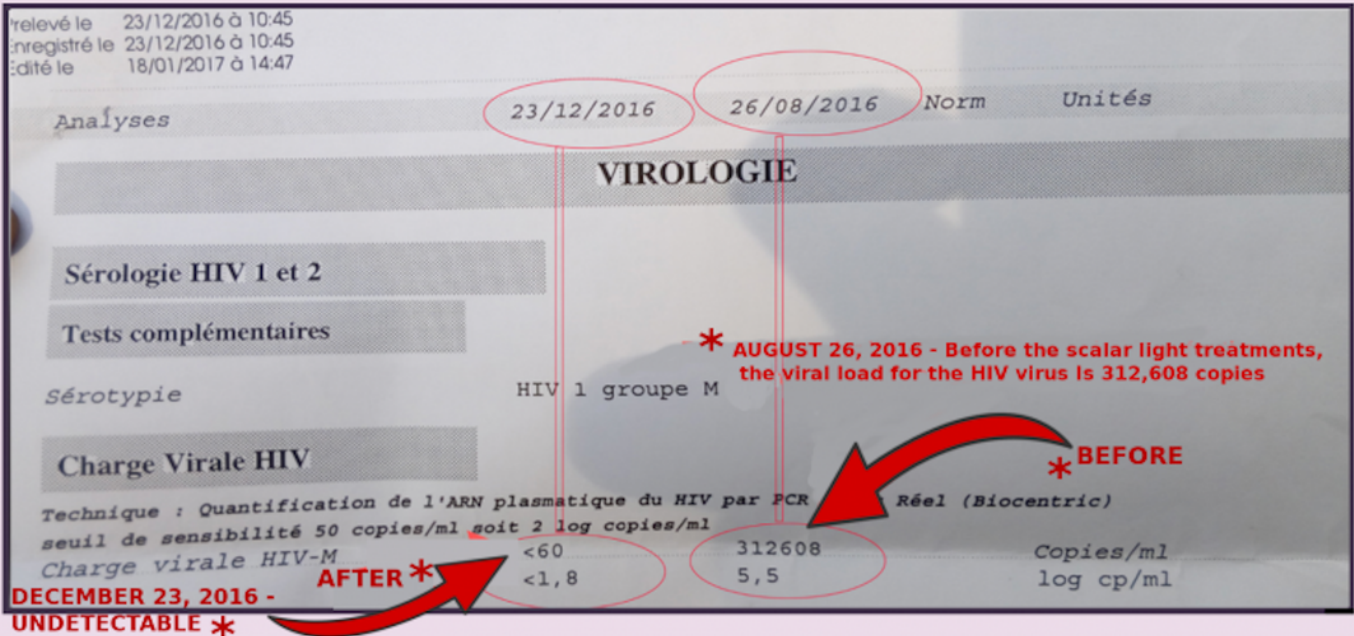

## Timeline

1992: HIV viral disease was detected as well as its associated symptoms. Anti-viral drugs were administered for 25 years in order to fight against the HIV infection. PCR tests were conducted during the 25 years of HIV infection resulting in a positive viral load for the HIV virus every time the diagnostic test was administered.

August 26, 2016: A polymerase chain reaction test was conducted that revealed 312,608 copies of the HIV virus per milliliter of blood.

September through December 2016: The Scalar Light Pathogenic Cleanse was administered and served to disassemble and eradicate the HIV virus from the body of the African woman.

December 23, 2016: A follow-up polymerase chain reaction test was conducted that revealed no viral load for the HIV virus. This PCR test result was the first time that no detectable viral load was experienced during the entire span of the 25 years of HIV infection.

*The Scalar Light Pathogenic Cleanse exclusively administers Scalar Light upon photographs of people, animals, plants, or objects. The Scalar Light Pathogenic Cleanse negates the molecular of the HIV virus (human immunodeficiency virus), thereby causing the infectious agent to cease to exist.*

*Subsequently, healing takes place as the body recovers from the HIV viral infection. Thereafter, the symptoms associated with the HIV viral infection diminish and typically disappear over time.*

*May God grant you excellent health. Thank you.*
